# LED LIGHT BULBS

## Save Hundreds of Dollars

### Cost Savings of LED vs Incandescent over 25,000 hours

|   | <u>LED (11 Watt)</u> | <u>INCANDESCENT (65 Watt)</u> |
|---|----------------------|-------------------------------|
| <b>Bulb Cost</b>  | \$19.95              | \$45.00 (\$3.75 x 12 Bulbs)   |
| <b>NOTE:</b> 65 watt incandescent bulbs cost \$3.75 each. It takes 12 bulbs to replace one LED bulb.        |                      |                               |
| <b>Kilowatt cost</b>  | \$27.50              | \$162.50                      |
| <b>NOTE:</b> Based on a cost of 10 cents per Kilowatt hour over the lifetime of an LED bulb (25,000 hours). |                      |                               |
| <b>TOTAL COST</b>   | <b>\$47.45</b>       | <b>\$207.50</b>               |

**NOTE:** That's a savings of over \$160.00 per bulb! Bulb replacement in multiple locations can save an additional 20% in air conditioning costs. Savings are based on an average daily bulb burn time of 5.4 hours.

## TOTAL SAVINGS – Over \$160 per bulb
